SUMMER IN CANADA

THE TRUE VALUE OF A SUMMER PROGRAMME EXPERIENCE WITH CISS

When parents make the decision to send their child for a study abroad experience, they are making a bold investment in future success.

As we move further into the 21st century, conventional wisdom suggests that individuals are most likely to succeed if they are equipped with as many transferable skills as is possible.

These skills, including problem-solving, communication, critical thinking, and collaboration, can be applied not only throughout their careers but also through their lifetime. Study abroad programmes are uniquely positioned to help children build these complex yet foundational competencies.

At CISS, we are acutely aware of the tremendous and positive impact that our programmes have on a child's emotional growth and personal development. We strive to offer relevant topics and content, carefully designed to lead students of all ages on a path of self-discovery and transformative learning.

Each of our programmes feature educational elements to:

- Empower students to think and act independently.
- Inspire students to be more socially aware through their exposure to people whose attitudes, values and cultures may be different from their own.
- Foster meaningful and cooperative interactions between students through group activities.
- Encourage students to negotiate through challenging situations they may encounter as a part of the communal living experience.

CISS is committed to providing enriching summer adventures, high school programmes, and homestay immersion experiences – delivered in a safe, nurturing and compassionate environment.

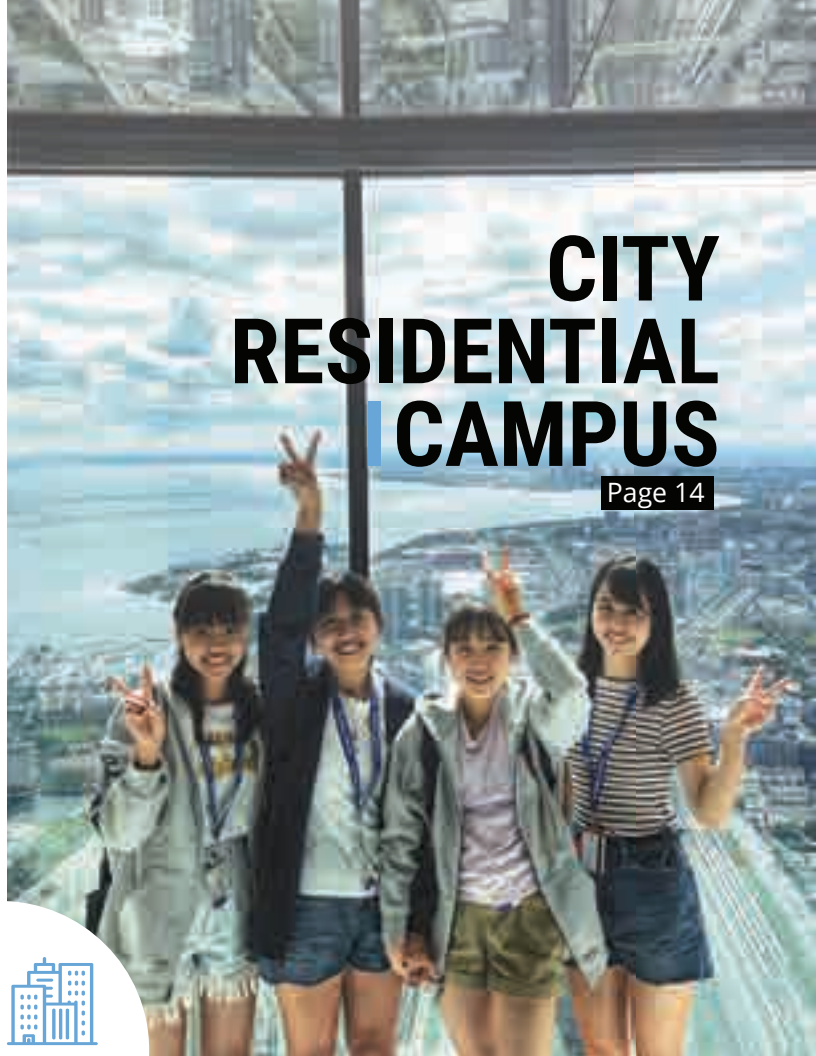

Choose to invest in an unforgettable learning experience for your child this summer. We invite you to make that choice Canada - with CISS!

Students 14 to 18 years old are invited to join our Summer Homestay Experience. Offered in various communities across Canada, this programme gives youth the opportunity to truly integrate into Canadian culture while living with a caring host family. Students join everyday activities and practice their English in a friendly, supportive, and safe home environment. They are also encouraged to immerse themselves in the local community and to experience the culture. Homestay is the ideal way to learn what life in Canada is all about!

Our host families believe that hosting an international student in their home is a rewarding and unique experience that will not only enrich the life of the young student, but that of their family as well. Host families come from a variety of cultural backgrounds and circumstances, but what they all have in common is a desire to provide a caring and supportive home away from home.

Students and host families are matched with careful attention to suitability. Placement with a student of a different nationality may be possible. Students are invited to join in the day-to-day activities with their family, but structured programming is not offered.

All our host families undergo a thorough screening process including interview, home inspection, and police background check. Homestay accommodation includes a private bedroom with bed, dresser, closet, as well as three meals each day and the use of in-house laundry facilities.
